For the voting questions, use the following scale identifying level of confidence - with 1 being the lowest or no confidence and 5 representing a high level of confidence.	Sedrakyan	Burke	Fendrick	Grant	Hiatt	Howard	Melkus	Mock	White	Marciniak	Doria-Rose	Gould	Rich	Woolf	Voting Member Average	Overall Average
1 How confident are you that there is adequate evidence to determine if the benefits outweigh the harms of lung cancer screening with LDCT [CT acquisition variables set to reduce exposure to an average effective dose of 1.5 mSv (please see footnotes)] in the Medicare population?	3	1	2	3	2	3	1	1	4	3	3	3	3	1	**2.22**	**2.36**
1 Low Confidence -2- 3 Intermediate Confidence -4- 5 High Confidence																
If the answer for Question 1 is at least in the 'Intermediate' range (mean score is 2.5 or more) please vote on the corresponding part(s) of question 1. If not, please continue to question 2.															**#DIV/0!**	**#DIV/0!**
a. how confident are you that there is adequate evidence to determine that screening in asymptomatic high risk adults over 74 years of age improves health outcomes? **The mean vote on question 1 was less than 2.5 so the panel members did not vote on this question.**															**#DIV/0!**	**#DIV/0!**
b. how confident are you that there is adequate evidence to determine that annual screening beyond 3 annual LDCT screens improves health outcomes? **The mean vote on question 1 was less than 2.5 so the panel members did not vote on this question.**															**#DIV/0!**	**#DIV/0!**
c. how confident are you that there is adequate evidence to determine that a lung cancer screening program implemented outside a clinical study improves health outcomes? **The mean vote on question 1 was less than 2.5 so the panel members did not vote on this question.**															**#DIV/0!**	**#DIV/0!**

For the voting questions, use the following scale identifying level of confidence - with 1 being the lowest or no confidence and 5 representing a high level of confidence.	Sedrakyan	Burke	Fendrick	Grant	Hiatt	Howard	Melkus	Mock	White	Marciniak	Doria-Rose	Gould	Rich	Woolf	Voting Member Average	Overall Average
2 How confident are you that the harms of lung cancer screening with LDCT (average effective dose of 1.5 mSv) if implemented in the Medicare population will be minimized?	2	2	2	2	2	3	3	2	3	3	2	2	2	2	**2.33**	**2.29**

For the voting questions, use the following scale identifying level of confidence - with 1 being the lowest or no confidence and 5 representing a high level of confidence.	Sedrakyan	Burke	Fendrick	Grant	Hiatt	Howard	Melkus	Mock	White	Marciniak	Doria-Rose	Gould	Rich	Woolf	Voting Member Average	Overall Average
3 How confident are you that clinically significant evidence gaps remain regarding the use of LDCT (average effective dose of 1.5mSv) for lung cancer screening in the Medicare population outside a clinical trial?	5	5	5	5	5	4	5	4	4	4	5	4	4	5	**4.67**	**4.57**
