Annual Report to Congress
on the
Open Payments Program
April 2018

The Centers for Medicare & Medicaid Services (CMS) strives to make information available to all. Nevertheless, portions of our files including charts, tables, and graphics may be difficult to read using assistive technology.

Persons with disabilities experiencing problems accessing portions of any file should contact CMS through e-mail at 508_Compliance@cms.hhs.gov.

Executive Summary

The Open Payments program is a statutorily-required, national disclosure program that promotes transparency and accountability by making information about the financial relationships between the health care industry (applicable manufacturers and group purchasing organizations (GPOs)) and health care providers (physicians and teaching hospitals) available to the public.

The Open Payments data includes payments and other transfers of value made to covered recipients (physicians and teaching hospitals), along with ownership and investment interests held by physicians or their immediate family members in the reporting entities.

Payments are reported across three major reporting categories:

- **General Payments:** Payments or other transfers of value made that are not in connection with a research agreement or research protocol.
- **Research Payments:** Payments or other transfers of value made in connection with a formal research agreement or research protocol
- **Physician Ownership Information:** Information about the ownership or investment interests that physicians or their immediate family members have in the reporting entities

On June 30, 2017, the Centers for Medicare & Medicaid Services (CMS) published Program Year 2016 data, the third full year of data reported to Open Payments. In addition to the publication of Program Year 2016 data, all previous years were refreshed and republished¹ to reflect any updates made by reporting entities throughout the 2016 Program Year cycle.

In Program Year 2016, applicable manufacturers and GPOs collectively reported \$8.18 billion in payments and ownership and investment interests. These records are comprised of 11.96 million payment records attributable to 630,824 physicians and 1,146 teaching hospitals.

To encourage timely, complete and accurate reporting by the health care industry, CMS has the authority to impose civil monetary penalties on entities that are not compliant with Open Payments requirements. In Program Year 2016, CMS did not impose any civil monetary penalties.

Over the course of the Open Payments program CMS has published 40.77 million records, accounting for \$24.94 billion in payments and ownership and investment interests.

Table 1. Summary of Program Year Data

	2013*	2014	2015	2016
Total Number of Records	4.50 million	12.02 million	12.31 million	11.96 million
Total Value of Payments	\$4.09 billion	\$7.86 billion	\$8.09 billion	\$8.18 billion

*Program Year 2013 was a partial year of data collection (August 2013 – December 2013)

All numbers above 10,000 have been rounded

¹ Refreshed and republished data includes data corrections made to reported payments since their initial publication of data that were submitted by applicable manufacturers and group purchasing organizations (GPOs).

Open Payments Program Overview and Implementation

The Open Payments program is a statutorily-required, national disclosure program that promotes transparency and accountability by making information about the financial relationships between the health care industry (applicable manufacturers and group purchasing organizations (GPOs) and health care providers (physicians and teaching hospitals) available to the public.

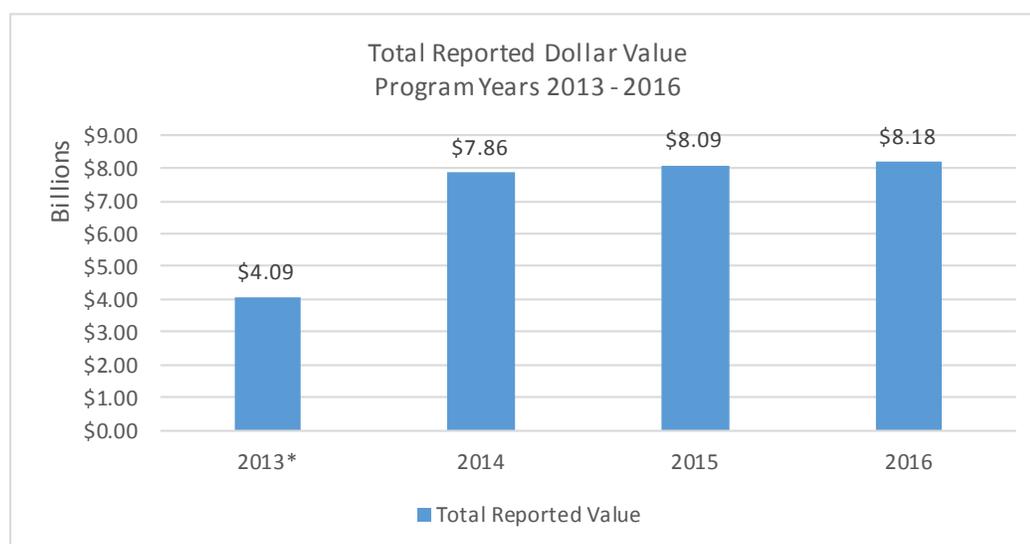

Through the Open Payments program, applicable manufacturers and GPOs, collectively referred to as reporting entities, report payments or transfers of value made to covered recipients (physicians and teaching hospitals), as well as ownership and investment interests held by physicians or their immediate family members in the reporting entities. Payments are reported across three main categories: general payments, research payments, and ownership and investment interests.

- **General Payments:** Payments or other transfers of value made that are not in connection with a research agreement or research protocol. General payments may include, but are not limited to honoraria, gifts, meals, consulting fees, and travel compensation. Detailed guidance on reported payment categories is available in the Open Payments Final Rule (78 FR 9477) and by regulation at 42 CFR. § 403.904.
- **Research Payments:** Payments or other transfers of value made in connection with a formal research agreement or research protocol
- **Physician Ownership Information:** Information about the ownership or investment interests that physicians or their immediate family members have in the reporting entities.

Since the inception of the Open Payments program, applicable manufacturers and GPOs have cumulatively reported \$24.94 billion² in payments and ownership and investment interests.

² All (cumulative) Open Payments data are calculated by totaling all program years' general payment and research payment values with the current program year's ownership and investment interest values. (Ownership and investment values represent current market value of ownership as of the last feasible valuation across applicable manufacturers and GPOs.)

Figure 1. Total Reported Value of All Program Years³

*Program Year 2013 was a partially reported program year representing data collected from August 2013 to December 2013.

The Secretary of the Department of Health and Human Services (HHS) is required to submit an annual Report to Congress summarizing the information reported to the Open Payments program, aggregated by applicable manufacturers and GPOs, as well as any penalties imposed by HHS that are directly related to the Open Payments program.

This report summarizes the financial transaction information and provides an overview of key program activities and achievements that occurred in Program Year 2016.

Program Year 2016

The Open Payments program functions on a yearly cycle consisting of four key activities: (1) Data Collection; (2) Data Submission; (3) Review, Dispute and Correction; and (4) Data Publication. The following is an overview of the Program Year 2016 timeline, projects and achievements.

1. **Data Collection:** Reporting entities collect data pertaining to payments made to covered recipients from January 1 through December 31 of each year, along with any ownership or investment interests held by physicians or their immediate family members in the reporting entity during that time. Data collection for Program Year 2016 took place from January 1, 2016 to December 31, 2016. On January 1, 2017 reporting entities entered a new program cycle and began collecting data for Program Year 2017.

³ Individual program years' Open Payments data are calculated by totaling the individual program year's general payment, research payment, and ownership and investment interest values. (Ownership and investment values represent current market value of ownership as of the last feasible valuation across applicable manufacturers and GPOs.)

2. **Data Submission:** Reporting entities submit the data that they have collected during each program year to the Centers for Medicare & Medicaid Services (CMS). The Program Year 2016 data submission period was February 1, 2017 through March 31, 2017.
3. **Review, Dispute, and Correction of Data:** Physicians and teaching hospitals are provided an opportunity to review the payments and other transfers of value that have been attributed to them. If they believe a record is inaccurate in any way, they may initiate a dispute and work directly with the reporting entity to correct the record. Although physician and teaching hospital review of the data is voluntary, CMS encourages their review of the data in an effort to ensure the accuracy. The review and dispute period for Program Year 2016 data began on April 1, 2017 and was available for physicians and teaching hospitals through May 15, 2017.

Reporting entities have an additional 15 days to correct any disputed records to ensure they are able to accurately respond to inquiries or disputes initiated during the review and dispute period, and make any necessary updates prior to the annual data publication. This additional 15-day correction period continued through May 30, 2017.

4. **Data Publication:** CMS releases the data to the public annually by June 30 of each program year. The data is displayed on the CMS public website at <https://openpaymentsdata.cms.gov>
On June 30, 2017 CMS published Program Year 2016 data along with the refreshed data⁴ from previous program years (2013 – 2015).

Figure 2 provides a visual of the Open Payments Program Cycle.

Figure 2. Overview for the Process of Open Payments

⁴ Refreshed and republished data includes data corrections submitted by applicable manufacturers and group purchasing organizations since their initial publication of data

In Program Year 2016, applicable manufacturers and GPOs reported \$8.18 billion in payments and ownership and investment interests to physicians and teaching hospitals. This amount is comprised of 11.96 million total records attributable to 630,824 physicians and 1,146 teaching hospitals.

Payments in the three major reporting categories were:

- \$2.80 billion in general payments
- \$4.36 billion in research payments
- \$1.02 billion of ownership or investment interests held by physicians or their immediate family members.

Over the course of the Open Payments program, CMS has published 40.77 million records, accounting for \$24.94 billion in payments and ownership and investment interests.

Table 2 outlines the cumulative reported value by individualized Program Year data.

Table 2. Summary of Open Payments Data - All Program Years

Reported Metric	Program Year			
	2013*	2014	2015	2016
Total Dollar Value of Reported Payments	\$4.09 billion	\$7.86 billion	\$8.19 billion	\$8.18 billion
Total Number of Records	4.50 million	12.02 million	12.31 million	11.96 million
Total Number of Reporting Applicable Manufacturers and Group Purchasing Organizations (GPOs)	1,413	1,614	1,579	1,481
Total Number of Physicians with Attributed Data	480,850	624,921	631,819	630,824
Total Number of Teaching Hospitals with Attributed Data	1,025	1,127	1,118	1,146

*Program Year 2013 was a partial year of data collection (August 2013 – December 2013)

Engagement and Outreach Efforts

CMS recognizes the importance of communication with program participants and stakeholders and works diligently to maintain communication with all parties involved in the Open Payments program. Throughout the course of Program Year 2016, CMS engaged with program participants in a variety of ways including electronic listserv distributions, educational webinars, question and answer sessions, newsletter distributions, monthly stakeholder calls, working groups, and mail campaigns.

- CMS conducted three health care industry webinars from February 2017 through April 2017. CMS utilized this opportunity to present timely program information and to respond to questions that attendees had regarding an array of topics including but not limited to reporting requirements, data submission, and review, dispute and correction actions.

- CMS communicated with health care providers in a variety of ways including, but not limited to, listserv distributions, in-person working groups, discussion forums, a National Provider Call, a mail campaign and personal phone calls. Through these communication channels, CMS educated providers about the Open Payments program and supplied the necessary resources to ensure efficient and effective participation in the program.
- Throughout the course of Program Year 2016, CMS maintained regular communication with stakeholders, sending 35 emails to 1.35 million recipients. These emails provided recipients with key program timeline reminders and deadlines, as well as general operational updates. Open Payments emails are distributed via the CMS Open Payments self-subscribe listserv and to Open Payments system users consisting of reporting entities and registered physicians and teaching hospitals.
- CMS engaged with program participants through social media outlets, tweeting via the official CMS Twitter account (@CMSGov) to remind participants of key timeframes and provide updates on program activities.

Following the Program Year 2016 data publication, the CMS Open Payments team continued communication with program participants. CMS attended multiple stakeholder events and discussions about the Open Payments program. During these interactions CMS was able to directly connect with program participants, discuss the impacts of the newest data release, and plans for future program activities.

The engagement and outreach efforts strengthened CMS' relationship with program participants, educated new and seasoned participants on program specifics, and positively impacted the Open Payments program.

Compliance Initiatives

Over the past calendar year, Open Payments compliance efforts have focused on improving the timeliness, accuracy, and completeness of the reported data. Analyses of the reported information have grown more robust with three full years of data available for comparison and trending. CMS targeted potential non-compliant entities through research and data analysis and conducted outreach to educate reporting entities about the Open Payments reporting requirements and their possible misreporting. The outreach resulted in the submission of previously unreported data and the correction of erroneously reported data.

CMS has the authority to impose civil monetary penalties for late, inaccurate, and incomplete reporting. CMS did not impose civil monetary penalties during Program Year 2016.

Open Payments Program Year 2016 Enhancements

During Program Year 2016, various enhancements were implemented to increase usability in both the Open Payments System as well as the public facing Open Payments website.

Open Payments System Enhancements

Open Payments system enhancements play a vital role in the program as this ensures that program participants' experience in the Open Payments system is as seamless as possible.

In Program Year 2016, the following system enhancements were debuted:

- Updated product related data elements
- Capability to manually edit a record's Home System Payment ID
- Updated delay in publication renewal methods
- Updated review and dispute grid for both reporting entities and physicians
- Updated Record Limit Change – users may enter a maximum of 5 products for Program Year 2016 and upcoming years

Open Payments Website Enhancements

In Program Year 2016 CMS made two significant enhancements to the public facing Open Payments website to enhance the public's ability to search and explore Open Payments data. These enhancements were the addition of a Payment by State page, and a physician compare feature.

- The Payments by State page allows the user to view national averages, total dollar amount received in payments per state and a summary of the natures of payments received by each state. These enhancements are presented as a map and a pie chart, respectively. The pie chart is sortable by both national and individual state views. See Figure 3 and Figure 4.
- The physician profile page was updated to include a physician compare feature. This feature enables users to view the physician as a sole practitioner as well as where they fall in comparison with other physicians in their like specialty. The physician compare feature is available for view by both total dollar value of general payments as well as total amount of general transactions that took place. See Figure 5.

Appendix A. Aggregate Data by Applicable Manufacturer/Group Purchasing Organization

The aggregated data included in this report contains data from Program Year 2016 on the public display site. This data set has undergone review and dispute for 45-days as per the final rule. As a result, CMS has confidence in the accuracy of the data provided in this Report to Congress. Any data that was found to have inconsistencies regarding the covered recipient of the payment or other transfer of value were rejected at the time of data submission and returned to the industry for correction and resubmission.
