* Years in which the outlier payment was made per claim rather than per separately paid service.

** Payment made per claim until April 1, 2002, at which point outlier payments were made on a service basis.

*** CMS determines CMHC eligibility for outlier payments using only a multiple threshold. CMS used the hospital multiple threshold for CMHCs until 2004, when a specific CMHC multiple threshold was established. Beginning in CY 2010, CMS determined CMHC eligibility for outlier payments for either level of Partial

Hospitalization using the payment rate for the APC applicable to CMHCs. We note that in the CY 2024 OPPS, CMHCs are paid through APCs 5851 through 5854 (which are for IOP and PHP services) and that OPSS outliers for each CMHC are capped at 8% of each CMHC's aggregate payments.
