

Medication Therapy Management:

The State of the Art
for Standards and
Interoperable
Data Exchange

Wednesday, November 18, 2015

3:00 p.m. – 4:30 p.m. EST

- CMMI Introductions & MTM Overview
- ONC Introduction
- What it means to be interoperable
 - Coding (SNOMED CT, RxNorm, LOINC)
 - Documentation (MTM NCPDP Specialized, C-CDA)
 - Exchange (Direct Edge Protocols, DirectTrust, SOAP, FHIR, JSON, Open API, REST)
- Current state of MTM related technology utilizing interoperable standards:
 - Question 1: What standards is your portion of the industry using, supporting or are proposing to use?
 - Question 2: How does your portion of the industry you are representing propose to support this type of technology?
 - Industry Perspective Panel:
 - » MTM subcontractor perspective
 - » Plan/payer perspective
 - » Switch perspective
 - » Prescriber perspective
 - » Pharmacist/Pharmacy perspective
- Closing Remarks
