NAME OF PROVIDER OF SUPPLIER MARSHFIELD CARE CENTER FOR REHAB AND HEALTHCARE		STREET ADDRESS, CITY, STATE, ZIP 800 SOUTH WHITE OAK MARSHFIELD, MO 65706	
For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.			
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)		
F 0880 Level of harm - Minimal harm or potential for actual harm Residents Affected - Many	<p>Provide and implement an infection prevention and control program.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY**</p> <p>Based on observation, interview, and record review, the facility failed to fully implement Centers for Medicare and Medicaid Services (CMS) and Centers for Disease Control (CDC) recommended infection control practices during the coronavirus disease 2019 (COVID-19, an infectious disease caused by severe acute respiratory syndrome coronavirus 2 ([DIAGNOSES REDACTED]-CoV-2)) pandemic, when facility staff failed to wear protective personal equipment (PPE) appropriately when assisting residents, when the facility staff failed to implement appropriate hygiene practices, and when staff failed to actively encourage residents to remain at least six feet apart or wear face masks when in close proximity.</p> <p>The facility census was 48. Record review of the recommendations for long-term care facilities, related to COVID-19 infection, located on the Centers for Disease Control website showed the following: -Nursing home residents are at high risk for infection, serious illness, and death from COVID-19; -Enforce social distancing (at least six feet apart) among residents (measures to reduce the spread of contagious disease by maintaining a physical distance between people and reducing the number of times people come into close contact with each other); -Ensure all residents wear a cloth face covering for source control whenever they leave their room or are around others; -Health care professional should wear a facemask at all times while they are in the facility. Record review of CDC.gov showed the following: -Face coverings should cover the nose and mouth and fit under the chin. The covering should fit snugly under on the sides of the face. Record review of the recommendations for Healthcare Providers, related to hand hygiene in healthcare settings, located on the CDC website showed the following guidance: -Use Alcohol-Based Hand Sanitizer (ABHS) immediately before touching a patient, before performing and aseptic task such as placing an indwelling catheter or handling invasive medical devices, before moving from work on a soiled body site to a clean body site on the same patient, after touching a patient or the patient's immediate environment, after contact with blood, body fluids or contaminated surfaces, and immediately after glove removal; -Wash with soap and water when hands are visibly soiled, after caring for a person with known or suspected infectious diarrhea, and after known or suspected exposure to spores. 1. Observation on 5/21/2020, at 10:45 A.M., showed residents sitting outside near the front entrance of the facility with the Administrator cooking food on a grill. The Administrator did not wear a mask while cooking food. One resident sat in his/her wheelchair next to the Administrator cooking food. The resident did not wear a face mask and was within six feet of the Administrator who did not wear a face mask. Three residents sat in wheelchairs next to each other, less than least six feet apart and not wearing face masks. Observation on 5/21/2020, at 11:05 A.M., showed residents present in the common area next to the nurses' station near the entrance to the facility. Two residents sat approximately four feet from each other in wheelchairs and not wearing face masks. Observation showed three residents sitting within two feet of each other and not wearing face masks. Observation on 5/21/2020, at 11:20 A.M., showed two residents in the dining area sitting at the same table next to each other not maintaining at least six feet of distance between them. Staff moved one resident to the other side of the table still within six feet of each other. The residents did not wear masks. Staff in the immediate area and did not attempt to separate the residents. During an interview on 5/21/2020, at 11:29 A.M., Resident #1 said staff take off their face masks while they are in the resident's room assisting the resident. The resident said the certified nurses aides (CNA) are mostly the staff that remove their face masks. Observation of the afternoon meal on 5/21/2020, starting at 11:54 A.M., showed the following: -On 5/21/2020, at 11:54 A.M., CNA A assisted a resident with his/her drink; -On 5/21/2020, at 11:56 A.M., CNA A walked away from the resident to get a drink for another resident. The CNA adjusted his/her face mask and scratched his/her nose with an ungloved hand. The CNA did not sanitize his/her hands before getting the drink for the resident. The CNA removed the plastic cover to the drink with his/her ungloved and non sanitized hands and placed the drink on the table for the resident. Observation showed the resident drink from the cup delivered by the CNA. -On 5/21/2020, at 12:02 P.M., CNA A did not have his/her face mask properly placed. His/Her face mask covered his/her mouth, but did not cover his/her nose. Observation showed the CNA scratched his/her face with an ungloved hand and pulled his/her face mask over his/her nose to properly place the face mask. Continuous observation showed the CNA sat with a resident to provide assistance for a resident. The CNA began assisting the resident without sanitizing his/her hands after touching his/her face and face mask. -Observation on 5/21/2020, at 12:07 P.M., showed Nurses Aide (NA) B assisted a resident in the dining room with his/her meal. The NA did not have his/her face mask appropriately worn. The NA's face mask did not cover his/her nose while providing assistance to the resident. -Observation on 5/21/2020 at 12:26 P.M., showed NA B assisting a resident at a dining table with his/her meal. The NA's face mask did not cover his/her nose. The NA scratched his/her nose with his/her right hand. The NA placed the mask over his/her nose and continued assisting the resident without sanitizing his/her hands. Observation on 5/21/2020, at 12:38 P.M., showed CNA C in Resident #2's room speaking to the resident approximately one to two feet away from the resident. Observation showed the CNA not wearing his/her face mask appropriately with the face mask pulled down below his/her chin exposing his/her nose and mouth. During an interview on 5/21/2020, at 12:52 P.M., CNA C said residents are supposed to be frequently monitored for social distancing and are to be kept six feet apart. Staff are supposed to sanitize/wash their hands before and after providing care to residents and after any possible contamination of their hands. Staff are supposed to wear their face mask at all times covering their mouth and nose. Observation on 5/21/2020, at 12:58 P.M., showed CNA A assisted a resident in the dining room with his/her meal. Observation showed the CNA pulled his/her face mask down exposing his/her nose. The CNA scratched his/her nose with his/her right hand and placed the face mask in the proper position. The CNA continued assisting the resident without sanitizing his/her hands. During an interview on 5/21/2020, at 1:07 P.M., CNA A said residents are to be monitored and redirected to adhere to six feet apart social distancing. The CNA said staff are to wash their hands or sanitize their hands before and after providing care. The CNA said if hands are contaminated at any point they need to be sanitized prior to continuing care. The CNA said staff are to wear face masks at all times and should securely cover their mouth and nose. Observation on 5/21/2020, at 1:12 P.M., showed two residents sitting in the common area near the dining room. The residents were sitting next to each other with no face masks on and within six feet of each other. Continuous observation showed two facility staff walked past the residents at 1:13 P.M., and did not separate or redirect the residents to an appropriate distance from each other. Observation showed a third staff passed the residents at 1:16 P.M., and did not separate or redirect the residents to an appropriate distance from each other. The residents were separated to an appropriate distance at 1:17 P.M., by facility staff. During an interview on 5/21/2020, at 1:18 P.M., Housekeeper D said residents are monitored and separated to maintain social distancing of six feet apart. The housekeeper said staff are to wear their face masks at all times and should cover their mouth and nose. During an interview on 5/21/2020, at 1:18 P.M., the Business Office Manager said residents are to be monitored for social distancing and are to be kept six feet apart. The Business Office Manager said staff are to wear face masks at all times and should cover their mouth and nose. The Business Office Manager said staff are to sanitize their hands before and after care and after any potential contamination. During an interview on 5/21/2020 at 1:23 P.M., Cook E said staff are to wear masks during their shift and should cover their mouth and nose at all times. During an interview on</p>		
LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE	TITLE		(X6) DATE

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)		
F 0880 Level of harm - Minimal harm or potential for actual harm Residents Affected - Many	<p>(continued... from page 1)</p> <p>5/21/2020, at 1:55 P.M., Registered Nurse (RN) F said all staff are to wear face masks during their shift and the face mask should cover their nose and mouth. The RN said residents are to be kept six feet apart. The RN said staff are to sanitize their hands before and after any care to residents. The RN said staff are to sanitize their hands after any possible contamination. The RN said all staff are responsible for COVID-19 precautions and infection control standards. During an interview on 5/21/2020, at 2:01 P.M., RN G said residents are to be kept six feet apart and staff are to monitor and redirect residents as needed. The RN said staff should sanitize or wash their hands before and after providing any care and should sanitize their hands after any possible contamination. The RN said staff are supposed to wear face masks at all times and they should cover their mouth and nose securely. The RN said all staff are responsible for ensuring compliance with infection control and COVID -19 standards. During an interview on 5/21/2020, at 2:21 P.M., Licensed Practical Nurse (LPN) H said face masks are to be worn by staff at all times and should cover their mouth and nose. The LPN said staff should sanitize their hands as often as possible including before and after care, and after any possible contamination including touching of the face or adjusting their face mask. The LPN said residents should be kept 6 feet apart and staff are to monitor and redirect/separate residents when observed. The LPN said all staff are responsible for ensuring compliance with infection control and COVID-19 standards. During an interview on 5/21/2020, at 2:21 P.M., the Administrator said staff are to sanitize their hands before and after care as well as after any possible contamination. The Administrator said staff should be wearing masks at all times and should cover their mouth and nose. The Administrator said residents should be kept 6 feet apart and staff should be monitoring and separating residents when residents are observed not maintaining social distancing. The Administrator said all staff are responsible for ensuring compliance.</p>
