* The American Hospital Association's *Coding Clinic for ICD-10-CM and ICD-10-PCS* issued coding advice regarding the correct coding of venous catheters under ICD-10. The advice states that correct coding of venous catheters depends on the end placement of the catheter, meaning the site where the device ends up. The HAC 14 Iatrogenic Pneumothorax with Venous Catheterization ICD-10-PCS procedure code list has been updated effective FY 2017 to reflect this coding advice.
