September 1, 2016

Preview Reports - Now Available

Prior to the release of data on IRF Compare, IRFs are given the opportunity to review data during a 30-day preview period using their Preview Report. The reports will be available from September 1- September 30, 2016. Reports can be accessed via the Certification and Survey Provider Enhanced Reports (CASPER) application, which is accessible from each IRF's "Welcome to the CMS QIES Systems for Providers" page. As finalized in the FY 2017 IRF PPS final rule, corrections to the underlying data will not be permitted during this time; however, IRFs may request CMS review of the data contained within their Preview Report, should they believe it to be inaccurate. All such requests must be made during the 30-day preview period.

Instructions on how to access the reports are available in the Download section below.
