

## 2018 Long Term Care Hospital (LTCH) Continuity Assessment Record and Evaluation (CARE) Data Set Section I, Active Diagnoses - ICD-10 Code Mapping

This document provides a mapping of Section I data elements in the LTCH CARE Data Set to ICD-10 codes, where applicable, in response to help desk inquiries and public comments received during the FY 2018 rule cycle. Definitions of primary diagnoses, comorbidities, and coexisting conditions in Section I remain unchanged. Providers should follow the coding instructions found in Chapter 3 Section I of the Long-Term Care Hospital (LTCH) Quality Reporting Program (QRP) Manual available in the downloads section of the LTCH CARE Data Set & LTCH QRP Manual web page. Note that this information is intended to assist providers in identifying patients with these diagnoses. For those diagnosis categories that are not based on a Hierarchical Condition Category (HCC), the list of diagnosis codes is not all inclusive. Section I data elements are used as risk adjusters and exclusion criteria in the calculation of the Functional Outcome Measure: Change in Mobility Among Long-Term Care Hospital Patients Requiring Ventilator Support (NQF#2632), Ventilator Liberation Rate, and Changes in Skin Integrity Post-Acute Care: Pressure Ulcer/Injury measures. For information about measure calculation please refer to the LTCH QM User's Manual, available in the downloads section of the LTCH QRP Measure information webpage.

## **Comorbidities and Co-existing Conditions**

### **I5602 At Risk for Malnutrition**

There are no ICD-10 codes for at risk for malnutrition. At risk for malnutrition is defined as being at risk for the diagnoses found on table 30. I5601 Malnutrition (protein or calorie). When determining whether a patient is at risk for malnutrition, clinicians should consider if the patient is unable or unwilling to take in food or water by mouth due to physical, cognitive, mental health, behavioral health, or treatment-related factors. Additionally, the clinician should consider if the patient is experiencing any severe symptoms that may impact their quality of life (e.g., severe pain or severe nausea) and could result in decreased food or water intake.

**Comorbidities and Co-existing Conditions**  
**I7100 Lung Transplant**

This information is intended to assist providers in identifying patients who have had an organ transplant. The presence of an organ transplant procedure code (ICD-10-PCS) in the patient's medical record from the acute care setting and /or a status Z-code (ICD-10-CM) may indicate that a patient had an organ transplant. Z-codes are diagnosis codes that indicate a patient has a specific medical history, a health status, or another problem that is not in itself an illness or injury but may influence patient care.

Please note, these are not the only indicators that a patient has a history of an organ transplant. As stated in the LTCH QRP Manual V4.0 Chapter 3, Section I, clinician's should review the medical record to identify active diagnoses. Medical record sources include, but are not limited to, transfer of health documents, prior hospital discharge summary, physician orders and progress notes, recent history and physical, medication administration records, consults, diagnostic reports, diagnosis/problem list(s), and other resources as available. For further details please review Chapter 3 of the LTCH QRP Manual.

Medical record sources include, but are not limited to, transfer of health documents, prior hospital discharge summary, physician orders and progress notes, recent history and physical, medication administration records, consults, diagnostic reports, diagnosis/problem list(s), and other resources as available. For further details please review Chapter 3 of the LTCH QRP Manual.

This information is intended to assist providers in identifying patients who have had an organ transplant. The presence of an organ transplant procedure code (ICD-10-PCS) in the patient's medical record from the acute care setting and /or a status Z-code (ICD-10-CM) may indicate that a patient had an organ transplant. Z-codes are diagnosis codes that indicate a patient has a specific medical history, a health status, or another problem that is not in itself an illness or injury but may influence patient care.

Please note, these are not the only indicators that a patient has a history of an organ transplant. As stated in the LTCH QRP Manual V4.0 Chapter 3, Section I, clinician's should review the medical record to identify active diagnoses.
